Ideation Phase
Define the Problem Statements

Date	31 January 2026
Team ID	[Enter Team ID]
Project Name	Global Fuel Prices and Taxation Analysis (2020 to 2026)
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. A well-articulated problem statement allows you and your team to find the ideal solution for the challenges your customers face.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Dr. Sarah Mitchell, an energy policy consultant who advises government agencies on fuel tax and subsidy		I cannot easily compare tax, subsidy and price across countries and regions	the data is spread over 27,468 weekly records with no single comparative view	Overwhelmed and unsure about my recommendations
PS-2	Marcus Thompson, a global supply chain manager at a multinational logistics company	lower transport fuel costs and plan fuel purchasing across several continents	fuel prices differ widely by region and change unpredictably over time	I have no one view of long-term trends, forecasts, cheapest markets and volatility	Anxious about budget overruns and poor procurement timing
PS-3	Professor Elena Rodriguez, an energy economics researcher	find out how income level relates to fuel tax, subsidy and affordability	I cannot see clear patterns across 84 countries without heavy manual work	the raw data is in separate records and subsidy is only a category, not a number	Frustrated and slowed down in my research
